

# Mobil Programlama

Hafta 8

# User Interface leri Gizleme açama

- `setVisibility(View.VISIBLE)`
- `toggle`

# Relative Layout Tek Eleman

- Parent view ile Child view in birbirlerinin durumlarına göre, Child view pozisyon alır.
- `android:layout_centerInParent:true`
  - Tam merkeze alır
- `android:layout_centerVertical:true`
  - Düşeyde Ortaya Alır
- `android:layout_centerHorizontal:true`
  - Yatayda Ortaya Alır

# android:layout\_centerInParent:true

## Tam merkeze alır

- ```
<Button  
    android:id="@+id/btnGo"  
    android:layout_width="242dp"  
    android:layout_height="225dp"  
    android:background="#FFFFFF"  
    android:backgroundTint="#4CAF50"  
    android:onClick="start"  
    android:text="Go"  
    android:textSize="80sp"  
    android:layout_centerInParent="true"  
  
    tools:visibility="visible" />  
RelativeLayout>
```

# android:layout\_centerVertical:true

```
<Button
    android:id="@+id/btnGo"
    android:layout_width="242dp"
    android:layout_height="225dp"
    android:background="#FFFFFF"
    android:backgroundTint="#4CAF50"
    android:onClick="start"
    android:text="Go"
    android:textSize="80sp"

    android:layout_centerVertical="true"
    tools:visibility="visible" />
</RelativeLayout>
```

# android:layout\_centerHorizontal:true

```
<Button
    android:id="@+id/btnGo"
    android:layout_width="242dp"
    android:layout_height="225dp"
    android:background="#FFFFFF"
    android:backgroundTint="#4CAF50"
    android:onClick="start"
    android:text="Go"
    android:textSize="80sp"

    android:layout_centerHorizontal="true"
    tools:visibility="visible" />

</RelativeLayout>
```

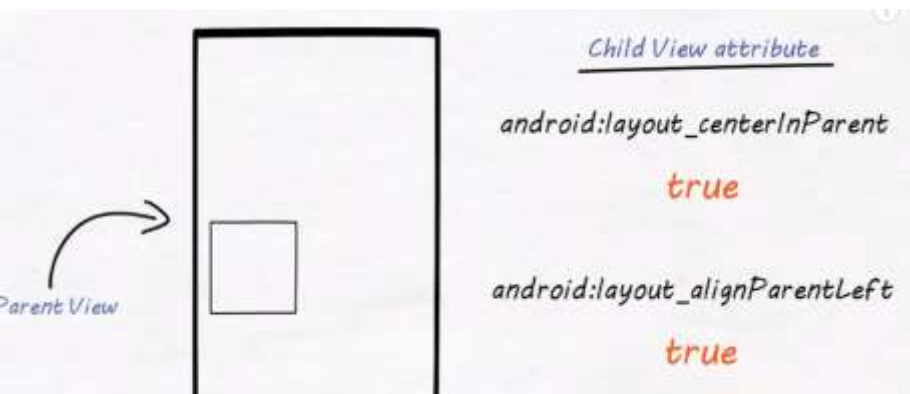

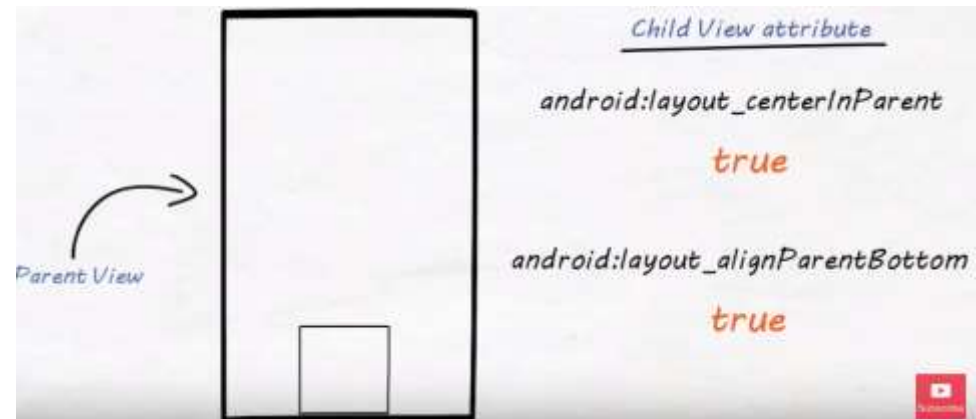

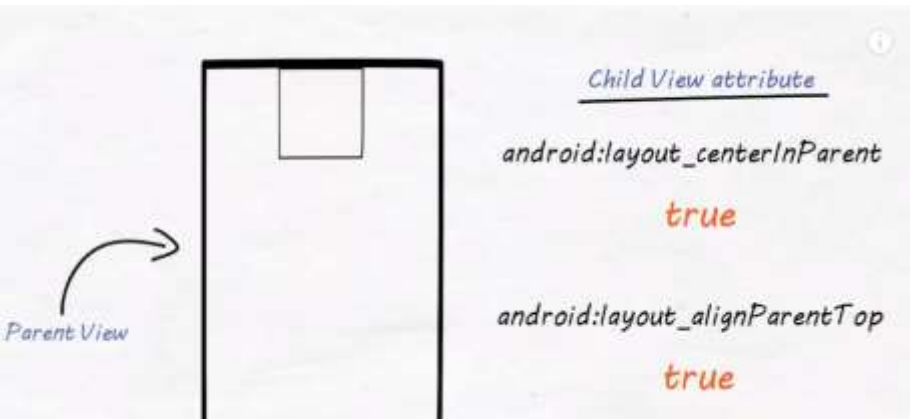

# Relative Layout

## Birden Fazla Eleman

- Her bir elemana ID verildiğine emin olalım çünkü birbirlerine göre durumu değerlendirilecek
  - `layout_centerInParent = true;`
  - `Android:layout_above:` id ile belirtilen elemana göre üstte
  - `Android:layout_below:` id ile belirtilen elemana göre altta
  - `Android:layout_toLeftof:` id ile belirtilen elemana
  - `Android:layout_toTheRigthOf:` id ile belirtilen elemana

# GridLayout

```
<androidx.gridlayout.widget.GridLayout
    android:id="@+id/grpButton"
    android:layout_width="match_parent"
    android:layout_height="455dp"
    android:layout_margin="10dp"
    android:layout_below="@+id/tvQuestion"
>

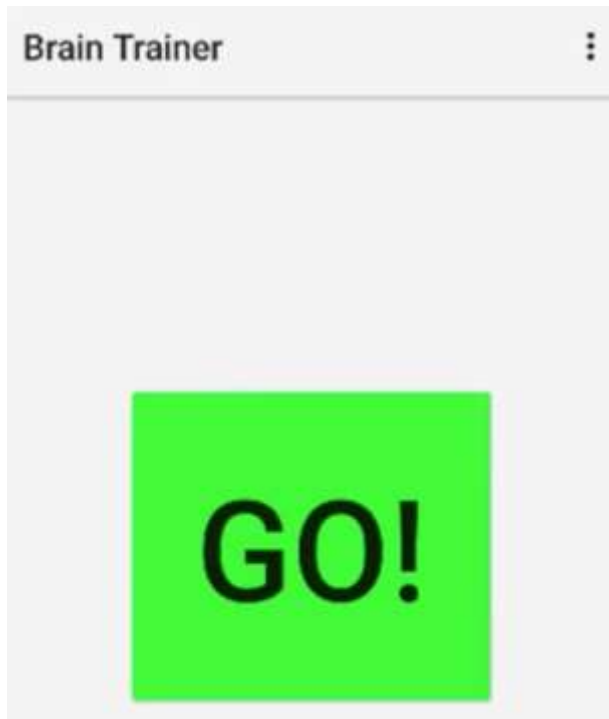

<Button
    android:layout_margin="10dp"
    android:id="@+id/btnOption1"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="1"
    android:textSize="80sp"
    app:layout_column="0"
    app:layout_row="0"
    app:layout_columnWeight="1"
    app:layout_rowWeight="1"
    app:layout_gravity="fill"
    android:tag="1"
    android:background="@android:color/holo_purple"
/>
```

# Download Web Content

- AsyncTask class
- BoilerPlate

```
public class MainActivity extends AppCompatActivity {  
  
    public class myTask extends AsyncTask<String,Void,String> {  
        @Override  
        public void onPostExecute(String s) {  
            Log.d( tag: "Output",s);  
            super.onPostExecute(s);  
        }  
        @Override  
        protected String doInBackground(String... strings) {  
            return strings[0];  
        }  
    }  
  
    @Override  
    protected void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.activity_main);  
        myTask theTask = new myTask();  
        theTask.execute("https://www.ticaret.edu.tr");  
    }  
}
```

# Adding HttpURLConnection

```
protected String doInBackground(String... strings) {
    String result="";
    StringBuilder sb= new StringBuilder("");
    java.net.URL url;
    HttpURLConnection con;
    try{
        url= new URL(strings[0]); // düzgün formatta olmazsa hata alınır
        con =(HttpURLConnection) url.openConnection();

        InputStream in= con.getInputStream();
        InputStreamReader reader = new InputStreamReader(in); // characterler olarak okunacak
        int data = reader.read();

        while(data!=-1){
            char c= (char) data;
            sb.append(c);
            data = reader.read();
        }
    }catch (Exception e){
        e.printStackTrace();
    }
    return "Failed";
}
```

```
return sb.toString();
}
```
